

Hunt ID: 5120-CO-GD-L-083-5000-MDeer-OS2AALAM-GO1M-D1DIE-Consistant Trophy Bucks

This hunt is not for the faint at heart! This is a hunt for 180 point plus RECORD CLASS muley's, we are not just saying trophy we are saying Record Class Muley's on agricultural ground and on high plains. This is where the 200 class bucks come from. The outfitter only take a total of 7 hunters per year so that the high age bracket of these deer continue so they can show their genes since he consistently brings home the bacon. The agricultural area is a low impact hunt spot and stalk. The high plains are Low Impact but can provide a walk and spot then stalk kind of hunt. One place or the other you will get your 1 in a million buck. Vouchers are available in rifle, muzzleloader and rifle season, one of each currently, but are usually sold out 3 years in advance.

Here are pics from bucks killed this year. I took six hunters and killed six bucks. Most average in the 180 class, some in the 170's and some in the 190's. Hunters with at least 6 preference points should draw for this year.

Since the Mule Deer are not migratory, they are always on his properties as he watches them grow to the point that their genes begin to show and harvests only a few of the biggest bucks each year.

The Hunts are 1 on 1 as a rule unless you want otherwise as with your hunting partner but I guess after you shoot yours or he shoots his it then becomes 1 on 1 anyway.

This is, believe it or not, for the most part a Low Impact Hunt. Most of the hunting is from a 4 wheel drive truck, glassing from the inside of the cab, finding the buck that you want and making a stalk for a shot on him.

Many outfitters say, they have big bucks and shoot a few big bucks but in this case because of his strict management this is by far the most consistent Trophy Buck around. There are also extremely few places where the bucks don't leave the property or migrate by season or even food sources. In this case the sources don't change, these big bucks are born there, grow up there and are shot when they make trophy class.

If his trophy quality buck number drops, he reduces the number of hunters he takes until he gets them back to the managed number.

In addition, it shows that the season doesn't matter much when you hunt, they are always there. All licenses are private land only, since this whole unit is all private land.

Season Resident Points Required	Non-Resident Points Required
Archery 3-4	Archery 3-4 Points
Muzzleloader 4-5	Muzzleloader 4-5
2nd Rifle 6-7	2nd Rifle 6-7
3rd Rifle 6-7	3rd Rifle 7-8
4th Rifle 8-9	4th Rifle 8-9

Rifle, Muzzleloader or Archery 5 Day Semi-Guided Hunt \$6000 reduced to only.....\$ 3495

If you know Mule Deer and don't need a guide this is the hunt for you. More than a Tress Pass fee hunt, this hunt includes a tour of the properties and where the big bucks feed, drink and bed. This can be a Drive, Glass and Spot and stalk hunt because it has thousands of acres of ground to cover. 1 Hunter and 1 non-Hunting Guest is the maximum number of people on the properties.

Rifle, Muzzleloader or Archery 5 Day Guided Hunt \$6000 reduced to only.....\$ 5495

Guided Hunts include Meals and Lodging. This is a fully guided hunt for 5 days.

=====

Hunters can fly into Alamosa, Colorado,

Transporting trophies out depends on client. Most use my taxidermist. Cost of taxidermy work and meat processing is paid by client.

There is an observer cost of \$500 if an observer is along for the guided hunt.

The hunt does not include license fees, taxidermy work or meat processing and meat shipping.

Lodging is local hotel 30-40 minutes from hunting area.

The outfitter will send a welcome letter at the time of booking and receipt of the deposit with all the details about the hunt.

ATV's & Pickups will be used during the hunt as needed. The outfitter and guide is one person with years of experience in taking these big bucks. Skinning and caping is included but meat processing is not although it is available locally for about \$200. A spotting scope is not needed but a good pair of binoculars is required.

I don't like to over sell a hunt so I will say typically, you will be taking mule deer bucks that will score 180 plus.

SUCCESS RATIO

ANIMAL SPECIE	OPPORTUNITY%	KILL RATIO %
Mule deer	100%	97%

There will be a moderate degree of physical required on this hunt due to the terrain and the sharp senses of mule deer of this caliber. Hunting will be mostly spot and stalk. You will be hunting private land. There is a total of 10,000 acres, 4000 being agriculture ground with river bottoms, 6000 being rim rock high desert with Rio- Grande River running through it.

This is not a high fence hunt but a fair chase hunt so there no guarantees that you will fill or the size of the buck you will fill with. The three things, the weather, the deer, and you're shooting, all of which are out of my control all I can do is provide you with the history of bucks taken in the past.

In saying that I will say there are Boone & Crockett bucks that live on my properties as you can tell by the bucks killed last year and the year before will see anywhere from 30-40 bucks a day in the last six years have had 100% success rate from bucks scoring from 165-218 only taking a maximum of seven hunters per year so deer have a chance to reach trophy potential. The dates of the hunt don't change things much since the herd is a resident herd and don't leave the property year around for the most part.
