

Hunt ID: KS-WDeerTurkey-All-Republican-RBHC-Kirby

We want you to have the hunt of a lifetime and to see that you do we spend all year with big bucks, and making them comfortable on the properties.

Whitetail Deer

We want you to shoot a trophy buck! You will not be charged a trophy fee as we encourage you to take an 8 point buck or greater. This practice gives younger bucks the opportunity to mature and promotes a sustainable, high quality (trophy) population for the future. The number of buck hunts will continue to be limited. We understand the importance of protecting young bucks combined with an adequate harvest of female deer to maintain a healthy population in balance with existing habitat conditions. This level of deer management involves the production of quality bucks, quality habitat, and most importantly quality hunting experiences.

We have private hunting ground in both Kansas ' deer hunting **Units 7 and 8**. Genetics in this area of the Republican River valley are outstanding. John Band shot a monster non-typical buck in 1965, which scored 258 6/8 and stands as #3 all time in the Kansas record books. John Nylund shot an impressive

typical whitetail buck in 1995, which scored 190 3/8 and stands as #5 all time in the Kansas record books. Both of these bucks were shot within 4 miles of our outstanding, private hunting habitat.

Wild Turkey

You can hunt two gobblers at River Bluff Hunting Co. compared to some areas of Kansas with a one bird limit. We have hunting grounds in both Unit 2 and Unit 3. River Bluff Hunting Co. offers outstanding turkey habitat! Spring turkey season in Kansas typically opens in early April and runs through the end of May. Our wild turkey numbers are excellent with numerous large gobblers. You will not be charged a trophy fee as we encourage you to shoot a mature gobbler. We have counted over 100 birds in one flock as they group up during winter months. The number of turkey hunts will continue to be limited to ensure a sustainable, high quality (trophy) turkey population. Rio Grande is the primary species in our area.
