Deer hunt for the Long Ranger, I didn't say Lone ranger, it is Long Ranger, as in shooting big whitetail at yardages over 300 yards, This is open country so you can see for a long distance, but you can also take shots at long distances if you are a skilled long range shooter. I would estimate a average yardage shot allows you to take advantage of a lot more rut pushed and moving deer. Sharpen up your shooting skills and bring that long range rifle you will have a good time deer hunting in Oklahoma.

Hunting Whitetail Deer

Although NW Oklahoma is known for its great Quail Hunting, you'll be hard pressed to find a better deal than our Whitetail Deer hunting. Oklahoma has a short rifle season (16 days) and a one week muzzleloader season which puts very little pressure on our Deer. We harvest a lot of Bucks in the 130 – 140 class range, but we'll also shoot some in the 150 – 170 class. These are big Whitetail Deer, weighing in between 175 – 225 lbs. Our hunts are semi-guided, meaning we'll show you an area and then let you setup and hunt your own spot. Each person will usually have around 200 acres to work with. This is open country and you'll see Deer out to 800 yards. We also have some Mule Deer, but not in large quantities. You can use your Whitetail tag to harvest a Mule Deer. Tags can be purchased over the counter for \$201.50 or a combination tag (Buck & Doe) for \$250.00. Come out and hunt the Big Whitetail with us today.

Hunting Mule Deer

This hidden pocket of mule deer is exciting to see and hunt. This is CRP, pasture and grain crop country with deep gullies and rolling sage brush hills. The mule deer are not in the river bottoms with the whitetail but out in the more open areas the steeper the gullies the better. The hunting is done on more of a traditional hunter against Mule deer of providing you a square mile section where you can work the area for the biggest Mule deer in the area. The hunt is during the rut so it involves getting to vantage points and glassing more than travels the 17,000 acres of private land by vehicle to spot and stalk. There is a 4 point to a side minimum and a maximum of 4 deer per year to be able to continue to provide quality buck every year.

You will be hunting food plots, feeders, wheat fields from box blinds and tree stands or steep canyon areas.
