ORYX

New Mexico Oryx hunting is one of the most exciting New Mexico big game hunts that we offer. These hunts take place on either the White Sands Missile Range in South Central New Mexico or public lands surrounding the missile range.

White sands Missile Range hunts are once in a lifetime unless a hunter applies for a broken horn Oryx hunt on range. Otherwise trophy hunts for the general public are once in a lifetime. There are numerous hunts throughout the year for Oryx both on and off range. Typically an average bull horn length will be at around 34 to 37 with a few bulls that can go 40 or touch bigger. Sportsman can experience the thrill of hunting Oryx in North America versus going all the way to Africa. Whenever a hunter draws a tag for Oryx it is an either sex tag, most of the time the cows will have longer horns than the bulls. Rifle hunting is the preferred method of harvesting an Oryx.

White Sands Missile Range

There are several areas within Whites Sands Missile Range that we hunt Rhodes Canyon, Stallion Range and Small Missile Range. All of these areas can produce trophy class New Mexico Oryx.

On range hunts are conducted by NMDGF in connection with the US Military.

There are a phenomenal number of Oryx on range; the only thing is knowing the animals habits and being able to field judge these magnificent animals. The off range Oryx big game hunting that we do is a bit more challenging because of the number of Oryx that wander off range. Although we have experienced less number of Oryx, off-range Oryx trophy hunting is still a hunting adventure most people will remember for a lifetime

Off The Range

Although we have experienced less numbers of Oryx off range we still have 100% shot opportunity on our off range and on range hunts.
